

# CUMBERLAND COUNTY FIRE CHIEF'S ASSOCIATION

## Cumberland County, North Carolina

Monthly meeting March 28, 1988 held at the Wade Fire Department.

The meeting was called to order by President Freddy Johnson and invocation was given by Chaplain Junior McLean. Roll call was taken and there were 22 stations and 9 associate members present. Minutes from the February meeting were read and approved. Treasures report for March 1988 was presented and approved.

### GUEST:

1. Miss Laura Tally\*\*\*\*\*North Carolina Senate
2. Mr. Don Beard\*\*\*\*\*North Carolina Senate
3. Mr. Stanley Johnson\*\*\*\*\*Candidate for Cumberland County Commissioners
4. Mr. Sherrell Riddle\*\*\*\*\*Candidate for Cumberland County Commissioners
5. Mr. Mike Sparks\*\*\*\*\*Syntor Gas Company

### OLD BUSINESS:

1. President Freddy Johnson advised the association that committee,s working on the fire hydrants for Cumberland County should have further information at the next meeting.
2. President Johnson also reported that the lights for the county mobile air unit have been installed and the radio should be installed in the near future.

### COMMITTEE REPORTS:

#### Education & Training

1. There was a concern about a fire science program to be taught by FTCC, this concern will be researched by the education committee.
2. There was a request by the education committee that the President of the FireFighters Association be contacted and asked where and what the funds from the Eastern Fire Seminar are being used for.
3. It was also announced that FTCC was still offering daytime classes for fire-fighters, anyone interested should contact Jerry Bloom.

### PLANNING & RESEARCH\*\*\*\*\*No Report

### STANDARDS & MUTUAL AID

1. Asked that all stations renumber there vehicles according to the new system adopted January 1, 1988.
2. Asked that all chief,s review the county SOP,s with their men.

### COMMUNICATIONS

1. There was some discussion concerning messages being given out over the air by EOC. As a result of the last association meeting and a lengthy discussion, the only messages given out in the future will be for emergencies only.
2. Doc Nunnery advised that beginning April 1, 1988 the emergency dispatchers will be seperated by having a fire dispatcher and a rescue dispatcher. The logging of emergencies will also be seperated, meaning that when your station completes a call the assignment number that you receive will actually be that number of fire calls for the month.
3. Doc also advised the association that his office will now dispatch on commercial alarms, the station that is responsible for that alarm first and the dispatch mutual aid stations afterwards.
4. Also as a result of the communications committee there will no longer be information given out by EOC concerning time and place of the association meetings. This information will be mailed out to each station along with the minutes of the meeting.

**CUMBERLAND COUNTY FIRE CHIEF'S ASSOCIATION**  
Cumberland County, North Carolina

NEW BUSINESS:

1. Fire Marshal Koonce advised the association that he had discussed the Pork Barrell Fund with Miss Laura Tally about getting some of these funds for the needed departments in Cumberland County.
2. Vice President J.F. Hall thanked all departments that participated in the drill at ICI Americus plant on Hwy. 53 March 10, 1988.
3. Fire Marshal Koonce announced that station 26, Beaver Damn F.D. now has a class 9 rating.
4. President Johnson thanked the association for the flowers he received while he was in the hospital.
5. President Johnson also announced that station 19 will host an open house, April 10<sup>th</sup>, all departments are invited.
6. President Johnson introduced Mr. Wally Fowler concerning a fund raiser for the fire chiefs association, there was some discussion about the fund raiser and a majority of the chief,s wanted to think about this and also take it back to their board of directors and have further information at the next meeting.

There being no further business, the meeting was adjourned at 10:03 p.m.

\*\*\*\*\*  
THE NEXT MEETING WILL BE HELD AT STATION SEVENTEEN, GODWIN-FALCON F.D. AT 1900 HRS.  
\*\*\*\*\*DINNER WILL BE SERVED\*\*\*\*\*

Respectfully submitted,  
  
David R. Chavis, Secretary

cy shall not be greater than 1/10 second in every 2 seconds.

(ii) Use of spread spectrum transmitters under this section of the rules is subject to approval by the applicable frequency coordinator of the radio service and equipment are to be used.

(4) In addition to the frequencies assigned for mobile service operation, one base station frequency above 152 MHz may be assigned in a particular area to permit intersystem communication between base stations or mobile stations or both. This frequency, use will not be authorized in any area where all available frequencies are required for independent systems.

(5) Frequencies in the 25-50 MHz, 150-170 MHz, and 450-512 MHz bands, and the frequency bands, 903-904 MHz, 904-912 MHz, 918-926 MHz, and 926-927 MHz may be assigned for the operation of Automatic Vehicle Monitoring (AVM) systems in accordance with § 90.239, notwithstanding this limitation.

(6) A licensee of a radio station in this service may operate radio units for the purpose of determining distance, direction, speed, or position by means of a radiolocation device on any frequency available for radiolocation purposes without specific authorization from the Commission, provided type accepted equipment or equipment authorized pursuant to § 90.203(b)(4) and (5) is used and all other rule requirements are satisfied.

(Sees. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307; secs. 4(i) and 303(c); Communications Act of 1934, as amended, §§ 0.131 and 0.331 of the Commission's Rules and 5 U.S.C. 553 (b)(3)(B) and (d)(3))

§ 90.21 Fire Radio Service.

(a) Eligibility. Any territory, possession, state, county, city, town, or similar governmental entity, and persons or organizations charged with specific fire protection activities are eligible to hold authorizations in the Fire Radio

Service to operate radio stations for transmission of communications essential to official fire activities of the licensee. Applications from persons or organizations other than governmental entities must be accompanied by a statement from the governmental entity having legal jurisdiction over the area to be served, supporting the request.

(b) Frequencies available. The following table indicates frequencies available for assignment to stations in the Fire Radio Service, together with the class of station(s) to which they are normally assigned and the specific assignment limitations which are explained in paragraph (c) of this section.

\* The frequencies in the band 10.55-10.68 GHz are available for Digital Termination Systems and for associated intermodal links in the Point-to-Point Microwave Radio Service. No new licenses will be issued under this subpart but current licenses will be renewed.

(c) Explanation of assignment limitations appearing in the frequency table of paragraph (b) of this section:

(1) The maximum output power of any transmitter authorized to operate on this frequency shall not exceed 10 watts.

(2) This frequency is reserved for assignment to stations in this service for intersystem operations only and these operations must be primarily base-mobile communications.

(3) The frequencies available for use at operational fixed stations in the band 72-76 MHz are listed in § 90.257(a)(1). These frequencies are shared with other services and are available only in accordance with the provisions of § 90.257.

(4) This frequency is not available for assignment to stations in this serv-

**Federal Communications Commission**

**OTHER PROVISIONS GOVERNING THE USE OF THE 816-821 MHz AND 861-866 MHz BANDS**

**§ 90.386** Number of systems authorized in a geographical area.

There shall be no limit on the number of trunked systems authorized to operate in any one given area except that imposed by allocation limitations and no person shall have a right to protest any other proposal on grounds other than violation of or any inconsistency with the provisions of this subpart.

**§ 90.388** Special licensing requirements for radio systems used to provide service to persons other than the licensee.

Where a trunked radio system is to be used to provide radio facilities to a user(s) on a commercial basis, any associated control points, control stations, and mobile radio stations shall be authorized only to the user(s) of those particular facilities.

**§ 90.390** Temporary permit.

An applicant for a Subpart M radio station license to use an already existing facility may operate the radio station(s) for a period of up to 180 days under a temporary permit evidenced by a properly executed certification of FCC Form 572 after the mailing of a formal application for station license, provided that the antennae(s) employed by the control station(s) is twenty feet or less above ground or twenty feet or less above a manmade structure other than an antenna tower to which it is affixed.

**Subpart N—Operating Requirements**

**§ 90.401** Scope.

The subpart prescribes general operating requirements for stations licensed under this part. This includes station operating procedures, points of communication, permissible communications, methods of station identification, control requirements, and station record keeping requirements.

**§ 90.403** General operating requirements.

(a) Licensee of radio stations in the private land mobile radio services shall

**§ 90.403**

be directly responsible for the proper operation and use of each transmitter for which they are licensed. In this connection, licensees shall exercise such direction and control as is necessary to assure that all authorized facilities are employed.

(1) Only for permissible purposes;

(2) Only in a permissible manner;

(3) Only by persons with authority to use and operate such equipment.

(b) In carrying out their responsibilities under § 90.403(a), licensees shall be bound by the provisions of the Communications Act of 1934, as amended, and by the rules and regulations of the Commission governing the radio service in which their facilities are licensed; and licensees may not, through written or oral agreements or otherwise, relieve themselves of any duty or obligation imposed upon them, by law, as licensees.

(c) Each licensee shall restrict all transmissions to the minimum practicable transmission time and shall employ an efficient operating procedure designed to maximize the utilization of the spectrum.

(d) Communications involving the imminent safety-of-life or property are to be afforded priority by all licensees.

(e) Licensees shall take reasonable precautions to avoid causing harmful interference. This includes monitoring the transmitting frequency for communications in progress and such other measures as may be necessary to minimize the potential for causing interference.

(f) Stations licensed in this part shall not continuously radiate an unmodulated carrier except where required for tests as permitted in § 90.405, except where specifically permitted by this part, where specifically authorized in the station authorization, or on an as needed basis in the Radiolocation Radio Service.

(g) The radiations of the transmitter shall be suspended immediately upon detection or notification of a deviation from the technical requirements of the station authorization and until such deviation is corrected. For transmissions concerning the imminent safety-of-life or property the transmitter

**§ 90.405**

missions shall be suspended as soon as the emergency is terminated.  
143 FR 54791, Nov. 22, 1978; 44 FR 32220, June 5, 1979)

**§ 90.405** Permissible communications.

(a) Stations licensed under this part may transmit only the following types of communication:

(1) Any communication related directly to the imminent safety-of-life or property;

(2) Communications directly related and necessary to those activities which make the licensee eligible for the station license held under this part. In addition, when communication service is provided under the cooperative sharing provisions of § 90.179, the licensee providing such service may transmit communications related to the activities for which the parties receiving the service would be eligible to be licensed.

(3) Communications for testing purposes required for proper station and system maintenance. However, each licensee shall keep such tests to a minimum and shall employ every measure to avoid harmful interference.

(b) The restrictions contained in paragraph (a) of this section shall not apply where a single base station licensee has been authorized to use a 470-512 MHz or 800 MHz frequency band.  
150 FR 6182, Feb. 14, 1985)

**§ 90.407** Emergency communications.

The licensee of any station authorized under this part may, during a period of emergency in which the normal communication facilities are disrupted as a result of hurricane, flood, earthquake or similar disaster, utilize such station for emergency communications in a manner other than that specified in the station authorization or in the rules and regulations governing the operation of such stations. The Commission may at any time order the discontinuance of such special use of the authorized facilities.

**47 CFR Ch. I (10-1-86 Edition)**

**§ 90.411** Civil defense communications.

The licensee of any station authorized under this part may, on a voluntary basis, transmit communications necessary for the implementation of civil defense activities assigned to station by local civil defense authorities during an actual or simulated emergency, including drills and tests. The Commission may at any time order the discontinuance of such special use of the authorized facilities.  
149 FR 36376, Sept. 17, 1984)

**§ 90.415** Prohibited uses.

Stations licensed under this part shall not:

(a) Transmit program material of any kind for use in connection with broadcasting; or

(b) Render a communications common carrier service, except for stations in the Special Emergency Radio Service providing communications standby facilities under § 90.49, or operational fixed stations licensed in the Railroad Radio Service handling public telegraph messages as agents of telegraph common carriers in those instances where such public telegraph service cannot be efficiently provided through other railroad facilities.

**§ 90.417** Interstation communication.

(a) Any station licensed under this part may communicate with any other station without restriction as to type, service, or licensee when the communications involved relate directly to the imminent safety-of-life or property.

(b) Any station licensed under this part may communicate with any other station licensed under this part, with U.S. Government stations, and with foreign stations, in connection with mutual activities, provided that where the communication involves foreign stations prior approval of the Commission must be obtained, and such communication must be permitted by the government that authorizes the foreign station. Communications by Police Radio Service stations with foreign stations will be approved only to be conducted in accordance with article 5 of the Treaty between the United States and the United Kingdom of Great Britain and Northern Ireland.
